Part III DETAILED ACTION

Allowable Subject Matter

1. Claims 42-66 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for the indication of allowable subject matter:

The closest art known to the examiner is listed on the PTO -892 form of the previous Office action.

None of the cited references disclose or suggest the applied RF power defining a selected power ratio that is a function of the electrode areas A_1/A_2 and being split between the susceptor and showerhead electrodes as required by the presently claimed invention. Beisswenger and Shah '637 do not disclose or suggest splitting the RF power as required by the present claims. As stated by the previous Office action Shah '937 fail to teach a power ratio based on an electrode area ratio. Therefore, there is no motivation for one of ordinary skill in the art, absent impermissible hindsight, to arrive at the presently claimed limitations. Therefore, the presently claimed invention is allowable over the cited prior art.

Conclusion

3. Any comments considered necessary by applicants must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue

Serial Number: 10/047,382
